Dear Parent/Carer

05/09/2022

RE: Height and Weight Checks for Children in Reception and Year 6

Each year in England, school children in Reception and Year 6 have their height and weight measured as part of the National Child Measurement Programme (NCMP). Your child's class will take part in this year's programme.

The checks are carried out by trained health care professionals from the school nursing team. Children are measured fully clothed, except for their coats and shoes, in a private area away from other pupils. Children will not be made to take part on the day if they do not want to.

Once completed, we will send you your child's measurements in a feedback letter. We may also contact you to discuss additional support. If your child's measurements indicate they are below a healthy weight we will automatically refer them to their GP. We are also able to refer to the Medway Healthy Weight Team; a service that offers a variety of interventions from phone calls to weekly clubs, cookery lessons and activity sessions, with all advice being optional.

Individual results are not shared with your child or their school. It is your choice if you share the information with your child.

In preparation for our visit, for Year R we also ask you to complete a Health Questionnaire.

You will find this by clicking the link below:

Once received, a member of the School Nursing Team may contact you to discuss any health concerns highlighted.

[Withdrawing your child from the National Child Measurement Programme](#)

If you consent to your child being measured, you do not need to do anything.

If you **do not** want your child's height and weight to be checked, or your child has a medical condition that affects their height or weight please let us know using the easy online form – link provided below.

[School health screening - opt out form :: Medway Community Healthcare](#)

Our preferred method is the online opt out form as this directly notifies the screening team of your wishes; however, if you do not have internet access please inform your child's school that you do not wish your child to have height and weight measurement taken.

The information we collect and what it is used for is listed below:

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets held by NHS Digital and Department of Health and Social Care may also be linked as this would let us add information from health and education records, where lawful to do so, to understand how and why the weight of children is changing, and how this affects children's health and education and how we can improve the care children receive. This includes your child's health data relating to;
 - their birth, hospital care (including time in hospital and out-patient appointments and diagnosis of medical conditions)
 - mental health
 - social care
 - primary care - includes all healthcare outside of hospital such as GP and dental appointments,
 - public health - including data relating to preventing ill health such as immunisation records
 - records for when and the reason why people pass away
 - medical conditions such as cancer, diabetes
 - health, lifestyle and wellbeing surveys that your child has participated in

- your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England

All the data collected is also used for improving health, care and services through research and planning.

How the data is used

We will store your child's information as part of their local child health record on the NHS's child health information database and share it with their GP.

Data is entered directly onto the secure NCMP NHS Digital database. NHS Digital is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

The information collected about your child will also be shared by NHS Digital with Public Health England but in a de-personalised form only. This means Public Health England will not be able to identify your child. Public Health England is responsible for working to protect and improve the nation's health.

Both NHS Digital and Public Health England will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS Digital or Public Health England that identifies your child.

De-personalised information from the National Child Measurement Programme may also be shared by NHS Digital with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS Digital only ever shares information for research with the approval of an independent group of experts.

If you would like to know more about the Medway School Nursing Team , please visit our website which has useful information on a range of child health issues as well as further information on school health checks – link below
